## LEESON ELECTRIC MOTORS, GEARMOTORS, AND DRIVES

- Sub-Fractional to 350 HP
- AC Inverters / SCR Controls
- Custom Motors
- IEC Metric Motors and Flanges
- Single and Three Phase
- Specific Purpose - Farm, Compressor, Washdown Duty and Stainless Steel
- LeeBiz - Online E-Commerce Capabilities

Check stock on-line:

## LINCOLN MOTORS

Motors up through 800 HP in Aluminum, Steel, and Cast Iron Construction:

- Stagger-Stacked Laminations
- Pressure Encapsulation Technology
- Extruded Aluminum Frame Motors
- Five Year Warranty on certain Electrical Group Products
- Steel Frame TEFC Motors in Sizes 284T-445T
- Ultimate E Motors (Premium Efficient Motors)
- Wash-Thru™ Motors for Harsh Environments

## BRAVO WORM REDUCERS & LeCENTRIC INLINE REDUCERS

Aluminum Inline & Right Angle Gear Reducers:

- Aluminum Housing Design for Compactness and Light Weight
- Up to 7-1/2 Input HP
- Modular Construction, Wide Array of Mountings for Maximum Flexibility
- Single or Double Reduction
- Ideal OEM Solution
- Direct Drop-In Replacements with Most Major Competitors

GROVE GEAR

ELECTRA-GEAR  
A Regal Beloit Company

## GROVE GEAR

One of the largest American manufacturers of Worm Gear Speed Reducers, committed to outstanding quality, on-time delivery, and superior service. This, combined with one of the most modern reducer manufacturing facilities in the world, has made Grove Gear the supplier of choice for most major industries worldwide.

kbelectronics.com

## KB ELECTRONICS

KB Electronics continues to dominate the fractional to 5-horsepower DC Drive Speed Control market. While DC motors and drives offer the user the ultimate in high performance, small size and low cost, small AC motors and drives are challenging that very concept. Our goal was to develop a line of AC Drives that would and could replace DC controls. Today KB offers you AC Drives that match the performance of DC drives but fit within the same footprint or are smaller than their DC counterparts.

visionmark.com

## VISION MARK

VisionMark, located in Sidney, Ohio, designs and manufactures engineered graphics for industrial OEMs and other manufacturers. We are the world's largest and most experienced manufacturer of deep-etched zinc. In addition, we are a completely integrated industrial screen-printer. Our products typically serve as product identification and man-machine interfaces, including applications as varied as control panels and pump panel tags for emergency response vehicles, safety and warning labels for metal-working machine tools, logoplates and promotional graphics for mechanics' and machinists' toolboxes, ID tags for returnable containers, and braille signage for elevator cab panels.
